
OSISKO

METALS

Osisko Metals is a Canadian exploration and development company creating value in the base metal space with an emphasis on zinc. In 2017, the company staked more than 50,000 hectares of mineral claims in the Bathurst Mining Camp. The objective is to develop a mineral resource base from multiple deposits to supply a central concentrator.

Osisko Metals offers a stimulating work environment with access to both professional and project level growth potential. Company values include health and safety at work, community consultation and protection of the environment, and quality control. Candidates must be registered, or have the ability to register as a “Qualified Person” under NI 43-101 regulations.

SENIOR PROJECT GEOLOGIST POSITION

NEW BRUNSWICK PROJECTS

Under the supervision of the Vice President of Exploration, the candidate will design and manage drilling campaigns.

The Senior Exploration Geologist plans, designs, and manages exploration programs as well as supervising a team of employees and contractors. He is results oriented and brings original and innovative thinking to all aspects of property evaluation and exploration.

- 7-15 years of experience in base metal exploration and deposit delineation.
- Strong experience and ability to manage complex drill programs independently.
- A critical skill is the candidate's ability to apply geological intuition, interpretive skills and compilation skills to a complex structural environment.
- Ability to design and manage deep drill holes.
- Strong interpersonal skills.
- Expertise with MapInfo, Discover, Discover-3D.
- Experience with GEMS, or equivalent, and Geosoft will be considered an asset.

JUNIOR PROJECT GEOLOGIST POSITION

NEW BRUNSWICK PROJECTS

Under the supervision of the Senior Geologist the candidate will assist in executing surface drilling campaigns.

The Junior Project Geologist assists the Senior Geologist to execute exploration programs. Responsibilities include quality control, accurate collection and reporting of geological data, and proper implementation of technical programs.

- 1-5 years of experience in mineral exploration.
- Experience with diamond drilling and drilling projects.
- Strong interpersonal and organizational skills.
- Ability for rapid proficiency in using MapInfo, Discover, Discover-3D, Geotic and other GIS software.
